The REDinc. artists are a diverse group of artists with a disability who make work using a variety of methods and mediums.

The artists have created a collection of artworks influenced by their life experiences, personal interests and unique ways of making.

REDinc. is a disability support organisation based in Northern NSW with centres in Lismore, Mullumbimby and Casino.

The REDinc. Supported Art Studio program supports artists with a disability to develop artworks, experiment with different mediums and genres and build their art practices within a vibrant studio environment, with support from professional artists and arts workers.
