HEAVEN ON EARTH
A Visionary Art Exhibition

MARCH 17 – APRIL 5 2017

OPENING 6 PM – 8 PM FRIDAY MARCH 17 2017

Lone Goat Gallery - 28 Lawson St, Byron Bay NSW 2481

Heaven on Earth is a psycho-mythic journey through universal archetypes. Alex Carletti seeks to depict a personal vision of a transformative world, cultivated through his personal inner journey and shamanic healing work.

Heaven on Earth is a message of hope, renewal and trust in our capacity for self-healing, collective renewal and the sacred responsibility of living on our Planet.

"In the beginning there was one perception, one reality, one people and one community. The one community then divided into different languages, religion and cultures. This di-vision is a function of the historical process. To heal the di-vision is to restore vision from within, then the outer world conforms to the inner world of cosmic order".

Art has a role in a new vision and myth for our current times. This exhibition is an exploration of an inner visionary journey of envisioning a world based on the highest principles and aspirations of our species. As a contemplation on universal archetypes, Heaven on Earth is a journey through an alchemical process.

Culture calls upon the arts for the evolution of consciousness and the arts call upon culture for co-operation and an audience for expressing inner truths manifested through the expressive arts.

This exhibition is a call for a vision that has the capacity to speak to us personally and guide us towards a sustainable future where the best within is honoured and brought forth. Alex Carletti is new to the Byron Shire and works as an art therapist, tarot reader and guide on the inner path.
