

ALEX CARLETTI

BIO

Alex Sandro Carletti is a contemporary visionary artist currently based in the Byron Shire. He studied and graduated at Adelaide Central School of Art, focusing his attention upon oil painting.

His artwork emerges through meditations and vision quests often through solitude in nature. As a practising Art Therapist, he has been working in the healing arts for two and a half years, utilising art and shamanic process' to unravel inner spaces and heal psych-spiritual wounds.

His work seeks to capture transcendence, sacred themes and altered states of consciousness. A spiritual quest for illumination and self-healing has led him through many rites of passage and initiations of understanding and insight, reflected through his art practice.

"Art has a role in a new vision and myth for our current times. Alex's work is exploration of an inner visionary journey of envisioning a world based on the highest principles and aspirations of our species. As a contemplation on universal archetypes, my work is a journey through an alchemical process.

Culture calls upon the arts for the evolution of consciousness and the arts call upon culture for co-operation and an audience for expressing inner truths manifested through the expressive arts.

My work is a call for a vision that has the capacity to speak to us personally and guide us towards a sustainable future where the best within is honoured and brought forth."

Alex Carletti is new to the Byron Shire and works as an art therapist, tarot reader and guide on the inner path.
